PLATINUM SPONSOR

CrowdStrike (NASDAQ: CRWD) is a global cybersecurity leader that has redefined modern security with the world's most advanced cloud-native platform for protecting critical areas of enterprise risk – endpoints and cloud workloads, identity, and data.
Powered by the CrowdStrike Security Cloud, the CrowdStrike Falcon® platform leverages real-time indicators of attack, threat intelligence, evolving adversary tradecraft and enriched telemetry from across the enterprise to deliver hyper-accurate detections, automated protection and remediation, elite threat hunting and prioritized observability of vulnerabilities.

Purpose-built in the cloud, the Falcon platform enables partners to rapidly build best-in-class integrations to deliver customer-focused solutions that provide scalable deployment, superior protection and performance, reduced complexity and immediate time-to-value.

GOLD SPONSOR

Palo Alto Networks is the world's cybersecurity leader. We innovate to outpace cyberthreats, so organizations can embrace technology with confidence. We provide next-gen cybersecurity to thousands of customers globally, across all sectors. Our best-in-class cybersecurity platforms and services are backed by industry-leading threat intelligence and strengthened by state-of-the-art automation. Whether deploying our products to enable the Zero Trust Enterprise, responding to a security incident, or partnering to deliver better security outcomes through a world-class partner ecosystem, we're committed to helping ensure each day is safer than the one before. It's what makes us the cybersecurity partner of choice.

At Palo Alto Networks, we're committed to bringing together the very best people in service of our mission, so we're also proud to be the cybersecurity workplace of choice, recognized among Newsweek's Most Loved Workplaces (2021), Comparably Best Companies for Diversity (2021), and HRC Best Places for LGBTQ Equality (2022). For more information, visit www. paloaltonetworks.com.

EclecticIQ is a global provider of threat intelligence, hunting and response technology and services. Stay ahead of rapidly evolving threats and outmaneuver your adversaries by embedding Intelligence at the core™ of your cyberdefenses with our open and extensible cybersecurity platform and ecosystem.

The most targeted organizations in the world – including governments and large enterprises – use our platform to operationalize threat intelligence by looking beyond IOCs, to deepen threat hunting, detection and response capabilities by detecting sophisticated and elusive threats, and to accelerate collaboration for improved security team effectiveness and efficiency.

Our customers are supported by a partner ecosystem of the world's premier technology and services providers, and by our design philosophy which embodies the flexibility and interoperability of open standards. Founded in 2014, EclecticIQ is a leading European cybersecurity vendor operating worldwide with offices and teams across Europe and UK, North America, India and via value-add partners. www.eclecticiq.com

PRODAFT is a pioneering company in the threat intelligence industry having its headquarters in Switzerland. Today's security professionals face a constant flood of "partially relatable" threat alerts and notifications from multiple vendors. The non-stop flow of unverified alerts creates an extremely demanding workload for security teams.

PRODAFT's threat intelligence platform reduces the time and energy spent on analysis, interpretation, and verification of potential threats. It gives security operatives on-demand insight into threat profiles on an individual basis. Every day hundreds of companies from critical sectors use PRODAFT's solutions to receive actionable insights right from the source.

PRODAFT had published numerous threat intelligence reports publicly regarding high-end cybercrime groups such as Fin7/Carbanak, Silverfish, Conti, LockBit, FluBot, and prevented thousands of breaches globally. www.prodaft.com

Intel 471 empowers enterprises, government agencies, and other organizations to win the cybersecurity war using near-real-time insights into the latest malicious actors, relationships, threat patterns, and imminent attacks relevant to their businesses.

The company's TITAN platform collects, interprets, structures, and validates human-led, automation-enhanced results. Clients across the globe leverage this threat intelligence with our proprietary framework to map the criminal underground, zero in on key activity, and align their resources and reporting to business requirements. Intel 471 serves as a trusted advisor to security teams, offering ongoing trend analysis and supporting your use of the platform. Learn more at https://intel471.com/.

Cybersixgill continuously collects and exposes the earliest possible indications of risk, moments after they surface on the clear, deep and dark web. Our proprietary algorithms extract data from a wide range of sources, including content from limited-access deep and dark web forums, underground markets, invite-only messaging groups, code repositories, paste sites and clear web platforms, as well as an unparalleled archive of indexed, searchable historical data from as early as the 1990s. This data is processed, correlated and enriched with machine learning techniques to create profiles and patterns of malicious threat actors and their peer networks, delivering critical insight into the nature, source and context of each threat. Our extensive body of threat intelligence data can be consumed through various solution offerings and integrations, each addressing critical customer pain points and use cases. These solutions are scalable, searchable and seamlessly integrated into existing security stacks, quickly arming enterprises, government and MSSPs alike with accurate, relevant and actionable insights to proactively block threats before they materialize into attacks.

Accenture Security is a leading provider of end-to-end cybersecurity services, including advanced cyber defense, applied cybersecurity solutions and managed security operations. Our team of highly skilled professionals, coupled with a global network of Advanced Technology and Intelligent Operations centers help us to enable clients to innovate safely, build cyber resilience and grow with confidence.
