EVENT SPONSORS AND EXHIBITORS

Created to enable you and your CBRN / HazMat response teams to ensure their incident response capability is optimised and in a state of verifiable readiness, our powerful CBRN / HazMat training systems are in use by Military, Government and industrial organisations worldwide including the France, UK, USA, Canada, Germany, Sweden, India and Australia. Visit our exhibition booth to see for yourself how our simulation systems can enhance your organisations operational readiness in a cost effective, safe, environmentally friendly and engaging manner and arrange a free no obligation trial.

Environics has over 30 years of experience in improving CBRN safety around the world with its in-house technologies and portable and fixed monitoring solutions. Different organizations in over 50 countries, from civil defence and homeland security to the military, have already selected Environics as their partner in CBRN threat detection.

ITL Solutions is your source for systems and equipment to meet today's requirements and tomorrow's unknowns. As a SDVOSB with the right systems to meet your needs, ITL Solutions is proud to be the US Distributor of the Cristanini S.p.A. line of Chemical, Biological, Radiological Decontamination equipment, a world leader since 1972.

OHD specializes in the equipment needed to run an effective Respiratory Protection Program. Our Quantifit® quantitative respirator fit tester continues to provide accurate, reliable, OSHA and NFPA compliant respirator fit testing in two minutes in any environment with no consumables using Controlled Negative Pressure. You can fit test outside, in an open bay, or a large warehouse. When you use air to challenge your mask, it opens the door for where you can work. Now, the new QuantiCheck, the world's first ever quantitative negative pressure user seal check device, delivers assurance in seal with each donning. Visit us at www.ohdglobal.com

Synopsis coming soon...

The **All Hazards Regional Multi-Agency Operations and Response (ARMOR)** section is the CBRNE investigative Unit for the Las Vegas Metropolitan Police Department (LVMPD). It is a task force consisting of members of the Las Vegas Metropolitan Police Department (8), North Las Vegas Police Department (1), Henderson Police Department (1), and Nevada Division of Investigations (1). This eleven person unit was established in 2005 and was designed in response to the newly faced CBRNE threats that emerged during the post 9/11 era. ARMOR Detectives handle the down-range operations, evidence collection, scene documentation and investigation of all criminal CBRNE incidents in Southern Nevada. ARMOR works as the investigative entity of the Las Vegas Fire Department Bomb Squad (the only FBI certified bomb squad in Southern Nevada) and the Las Vegas Fire Rescue (LVFR) Haz-Mat and CBRNE units. ARMOR personnel and LVFR CBRNE crews routinely conduct joint down-range entries. This is a necessary practice due to the limits of manpower as well as the extreme temperatures experienced in Southern Nevada. All ARMOR Detectives are Haz-Mat Technician, Confined Space, and High Angle Rescue certified. ARMOR is additionally tasked with conducting all robotic operations for the many Southern Nevada SWAT Teams.

SUPPORTING PARTNERS

The Resilience Advisors Network - Supporting organisations with only the very best advice from professional practitioners. Providers of Civil Protection, Emergency Service and Disaster Management expertise from the European Union and Worldwide.

The Observatory on Security and CBRNe Defence - Osdife is a national and international reference for researchers and specialists on these fields and, for that, it contributes to experience enhancement, development and sharing by means of study, analysis, research, education, training, workshops, symposium and publications, also involving public and private institutions, agencies, organizations, associations, companies and individuals, in order to promote and encourage the development and adoption of appropriate strategies and initiatives for risks reduction and mitigation, to ensure citizens security and safety and to guarantee the integrity, defence and protection of public and private assets, territory, infrastructure and cultural heritage also in the field of CBRNe Risk and WMD Proliferation

The Department of Electronic Engineering (DIE) of University of Rome "Tor Vergata" was founded in 1983 and now counts about 150 people, including faculty, staff, and cooperating personnel. In terms of traditional scientific areas, the department's expertise lies in the disciplines of control theory, electronics, electrical engineering, measurements, opto-electronics, telecommunications but also safety, security, defence and intelligence. However, today research is typically carried out with multi-disciplinary approaches, dealing with specific application scenarios and systems. In this since the beginning, many of the DIE teachings and research activities have had the aim to develop, deepen and promote national and international scientific and technical education, studies and researches in the field of Territorial Protection, Safety, Security and Intelligence. In particular the Research Area "Security and Defence" offers expertise in the following sectors: Homeland Security, Military Defence, Civil Defence, Civil Protection, CBRNe Risk and WMD Counterproliferation.

The "Center for Security Training and Education" (CUFS) of state University of Republic of San Marino is born in 2010 moving from an approach centered on scientific research and training to an approach oriented to the application of the discipline and to the solving of problems connected to the security area.

Starting from this first phase, the CUFS, thanks to the several professionals and skills which have been improved through years, today is an international Center of Excellence for analysis, dissemination, innovation and growing of sciences in the field of security, defence, intelligence and territorial risk. This achievement has been also possible thanks to the activities of design, development and promotion of studies, research, dissemination, networking, education and training. These activities have the objective to address and support the know-how's growth and innovation in methodologies and technologies of public and private Institutes and Organizations operating in the area of Security Defence & Intelligence. Moreover, the very same activities are applied also to specialists, technicians, experts, professionals and researchers such as to everyone who is interested in these issues.
