Synopsis coming soon...

The **All Hazards Regional Multi-Agency Operations and Response (ARMOR)** section is the CBRNE investigative Unit for the Las Vegas Metropolitan Police Department (LVMPD). It is a task force consisting of members of the Las Vegas Metropolitan Police Department (8), North Las Vegas Police Department (1), Henderson Police Department (1), and Nevada Division of Investigations (1). This eleven person unit was established in 2005 and was designed in response to the newly faced CBRNE threats that emerged during the post 9/11 era. ARMOR Detectives handle the down-range operations, evidence collection, scene documentation and investigation of all criminal CBRNE incidents in Southern Nevada. ARMOR works as the investigative entity of the Las Vegas Fire Department Bomb Squad (the only FBI certified bomb squad in Southern Nevada) and the Las Vegas Fire Rescue (LVFR) Haz-Mat and CBRNE units. ARMOR personnel and LVFR CBRNE crews routinely conduct joint down-range entries. This is a necessary practice due to the limits of manpower as well as the extreme temperatures experienced in Southern Nevada. All ARMOR Detectives are Haz-Mat Technician, Confined Space, and High Angle Rescue certified. ARMOR is additionally tasked with conducting all robotic operations for the many Southern Nevada SWAT Teams.

In terms of traditional scientific areas, the department's expertise lies in the disciplines of control theory, electronics, electrical engineering, measurements, opto-electronics, telecommunications but also safety, security, defence and intelligence. However, today research is typically carried out with multi-disciplinary approaches, dealing with specific application scenarios and systems. In this since the beginning, many of the DIE teachings and research activities have had the aim to develop, deepen and promote national and international scientific and technical education, studies and researches in the field of Territorial Protection, Safety, Security and Intelligence. In particular the Research Area "Security and Defence" offers expertise in the following sectors: Homeland Security, Military Defence, Civil Defence, Civil Protection, CBRNe Risk and WMD Counterproliferation.

The "Center for Security Training and Education" (CUFS) of state University of Republic of San Marino is born in 2010 moving from an approach centered on scientific research and training to an approach oriented to the application of the discipline and to the solving of problems connected to the security area.

Starting from this first phase, the CUFS, thanks to the several professionals and skills which have been improved through years, today is an international Center of Excellence for analysis, dissemination, innovation and growing of sciences in the field of security, defence, intelligence and territorial risk. This achievement has been also possible thanks to the activities of design, development and promotion of studies, research, dissemination, networking, education and training. These activities have the objective to address and support the know-how's growth and innovation in methodologies and technologies of public and private Institutes and Organizations operating in the area of Security Defence & Intelligence.
